
VINCENT LIGHTING SYSTEMS

2013 PRODUCT CATALOG

This outdoor art installation, Breath of Life, at COSI in Columbus used Philips Color Kinetics ColorBlasts to make the building appear to be "breathing."

Dear Friends,

Welcome to our 2013 Product Catalog. We look forward to serving you again this year, by providing exceptional lighting solutions.

In March, we were pleased to see a great turnout for our Open House in Cleveland. Along with some fantastic new Philips VARI*LITE fixtures, the VL440 and the VLX3 Wash (which are now in our rental inventory), we displayed the new Philips Selecon PLCyc, an LED Washlight that smoothly lights surfaces up to 16 feet high.

While the market for LED fixtures continues to grow, there is still a demand for affordable conventional lighting, especially for ellipsoidals, where LED technology is just starting to reach. In response to this demand, Altman introduced the Phoenix, a conventional ellipsoidal, which features rotating barrels and controls you can adjust tool-free. We have demo fixtures in stock for both the PLCyc and the Phoenix. If you'd like to see one of these in action, call or email us, and we can set something up.

As our online store and website continue to grow, we are also active on Facebook, Twitter and Linkedin, and continue to send out our monthly eNews. We want to reach you where you frequent the most. Log onto our website to connect to any of these outlets.

Thank you for your continuing support of our business. We appreciate your loyalty. As always, your comments and suggestions are most welcome.

Sincerely,

Paul Vincent

37 INDEX

COLOR FILTERS ARE TYPICALLY USED TO ENHANCE A DRAMATIC EFFECT OR CORRECT THE COLOR RENDERING OF A LIGHT SOURCE. DIFFUSION SOFTENS A LIGHT BEAM AND ALTERS ITS SHADOW CASTING CHARACTERISTICS. PATTERNS (ALSO KNOWN AS GOBOS) ARE USED WITH ELLIPSOIDAL SPOTLIGHTS TO PROJECT IMAGES OR PROVIDE TEXTURED LIGHT. COLOR SWATCHBOOKS AND PATTERN CATALOGS ARE AVAILABLE TO ASSIST IN YOUR SELECTION. PLEASE CALL OR E-MAIL INFO@VLS.COM TO RECEIVE A FREE COPY.

5-15 female	5269C	8.55
5-15 Lex-Loc		
Lex-Loc connectors use cage clamp terminals, which use spring pressure, instead of screw terminals, whose connections can come loose over time. The spring delivers a pre-determined amount of pressure and automatically adjusts to shifting strands.		
female	X515C	8.55
male	X515P	5.75

YOUR GUIDE TO CONNECTORS

Which connector do you need? Use our guide below, or contact us at product@vls.com. We can help determine the right connector for your fixture.

Stage Pin Also known as 2P&G, GP or Pin Connectors, this type is the most common wiring device used in the entertainment lighting industry. If you need a connector for your fixture in the theatre, most likely, you will need this type.

Twist-Lock Also called NEMA Locking, L5-20 and GTL, the prongs on these connectors are curved. As the name implies, once plugged together, it is twisted to lock the connector and prevent it from being unplugged. It is consistent with standards set forth by the National Electrical Manufacturers' Association (NEMA).

Edison This connector is also referred to as U-Ground or GR. This is the most common wiring device of all (being that it is used in every home and business in America). A NEMA type, it has applications in all areas of the electrical industry.

Cam-Type Used mostly by touring rigs and other events where large amounts of power are needed temporarily, Cam-Type connectors provide a quick and easy weathertight connection for feeder cable and power distribution.

STAGE PIN EXTENSIONS (2P&G, 12/3 SOW-A)

TERMINATORS

3-Pin	DMX3PTERM	$ 13.50
5-Pin	DMX5PTERM	13.50

DIFFERENT USES FOR DIFFERENT PINS

THREE-PIN This connector is generally used for headsets and other analog connections. You can find them on some smaller packs, such as the Lightronics LPX and Leviton MPX. Strobe connections are frequent users of three-pin cable.

FOUR-PIN Not as common as its three- or five-pin siblings, the four-pin is mostly used in color scrollers.

FIVE-PIN You will find the five-pin mostly on higher end consoles and automated fixtures, where the signal is DMX-512. A wiring diagram is shown below.

➔ *Specify Blue, Green, Orange, Pink, Red, White or Yellow. Gold and Invisible Blue also available at extra charge.*

SPOTLIGHTON...

ROSCO PROJECTION SCREEN

Here are some options in choosing the right projection screen for your needs. The following choices are available as raw material, 55" seamless, 86" seamless, 110" welded or finished to your specifications. Please contact our product department for samples, additional information or pricing.

Black useful in areas with high ambient light. Images have fine detail resolution when back lit.

Grey features wide viewing angles in rear projection.

Twin White: front or rear projection surface, no apparent difference in picture brightness, wide viewing angles.

Front White is a highly opaque, reflective material, specifically geared for front projection.

Light Translucent high, direct light transmission, sharp picture quality, minimal absorption loss. Commonly used in studios and stages where high level of ambient light is present.

SPOTLIGHT ON...

FLOORING OPTIONS

Need flooring for your stage, dance or television studio? We have some great options for you.

There are several factors you will want to consider before purchasing your floor. Think about who is going to use it, how often will the floor be used, what type of use will it get (for dance, will that be ballet, modern, ballroom, tap, multi-use?), high gloss or matte finish, will it be permanent installation, or will it need to be rolled up or stored away.

The wide selection of performance floor can by dizzying. Please call our Product department or e-mail us at product@vls.com, and we can help you pick the best floor for your needs.

ELLIPSOIDALS ARE PRIMARILY USED FOR LONGER THROW APPLICATIONS WHERE LIGHT SPILL NEEDS TO BE CONTROLLED. FRESNELS AND PARS ARE COMMONLY USED OVER THE STAGE. FOLLOWSPOTS CAN BE USED TO LIGHT A CONTINUALLY MOVING INDIVIDUAL, WHILE CYC LIGHTS PROVIDE AN EVEN FIELD OF LIGHT ACROSS A LARGER AREA OR BACKDROP. LED FIXTURES ARE POPULAR FOR WASHING AREAS WITH COLOR, WHILE STAYING COOL AND SAVING ON EXPENDABLE COSTS. MOST FIXTURES LISTED HERE COME WITH BARE LEADS. PLEASE REFER TO PAGES 7-11 FOR CONNECTORS AND LAMPS AT ADDITIONAL CHARGE.

SPOTLIGHTON...

ALTMAN PHOENIX ELLIPSOIDAL

We love how LEDs are changing the market; however, this technology is just on the cusp of being bright enough to work where ellipsoidals are needed, and the high price tag makes it unrealistic for many budgets. Altman has introduced the Phoenix, a standard conventional ellipsoidal that rises to match the features of its competition.

Compatible with GLA or HPL Series 375w, 575w and 750w compact filament lamps, the Phoenix sports a 360-degree rotating barrel, with locking shutters and gobos. Because of its ability to rotate, the Phoenix was also designed with a complete 360-degree enclosed accessory holder. The plano-convex lenses are spring mounted and heat resistant to minimize breakage. No tools are needed to interchange lens barrels. A color frame and safety cable are included with the fixture. Three 36" Teflon lead wires are encased in fiberglass, with a cord wrap provided. Made in the USA.

Scan the QR code for more info on this product.

SPOTLIGHTON...

PHILIPS SELECON PLCYC LED

The Philips Selecon PLCyc LED was designed to replace the equivalent of a traditional 4-color RGBW, 500W per circuit Cyc light. With the Powercon cabling system, the PLCyc can light a typical cyclorama from a single 20 amp circuit, while using only 150 watts. The fixture also supports wireless DMX for easy control.

The PLCyc delivers the performance of a 500 watt cyclight with a smooth even field for cycloramas up 16 feet high. It can be designed for top or floor mounting with kick stand yoke.

The field of light can be shaped using the barndoor accessory to provide a clean cut off line. Homogenized fully mixed color output light means you will see no multiple color shadows.

OSRAM KREIOS G1 LED IMAGE PROJECTOR

The new Kreios fixture from Osram is an ideal solution for areas needing image projection, including restaurants, museums, shopping malls, stores and other retail and architectural environments. With easily interchangeable standard and do-it-yourself gobos, brand names and logos can be projected at points of sale and exhibition booths.

Using high-powered, long-life LEDs, the KREIOS G1 projector has a dedicated optical system that delivers a sharp image of the gobo with an even distribution of light across the entire image. Thanks to this energy efficient, white LED light source, the KREIOS G1 LED image projector can deliver an output of 800 lumens using just 20 watts of power. The projector's compact and lightweight design allows for easy installation on walls, ceilings and floors, and its low heat output enables passive cooling and silent operation. Easy adjustments can be made without tools, with a pan of 270° and tilt of 120°.

Changes video black to a real blackout. Using one channel of DMX, the adjustable flag travels up to 90 degrees. Also allows operation from a simple toggle switch or from the output of a show controller.

SPOTLIGHTON...

GAM PLEXUS

GAM Plexus© is a software application for controlling entertainment lighting including intelligent lights, LEDs, conventional fixtures and accessories. GAM Plexus is ideal for theatre, film and television, theme parks, museums, retail and architectural applications in which creative control is essential.

GAM Plexus is a graphical user interface (GUI) program which you operate from a PC using a mouse and the standard conventions of any modern computer. It is flexible and much easier to use than conventional moving light consoles with knobs and encoders. Based on Magic Sheet format, it features an exceptionally quick learning curve, and electricians and designers find GAM Plexus to be intuitive and dynamic. Plus, users can configure the control panel the way that works best for them.

GAM Plexus is compatible with Windows Vista and newer versions; boot camp compatible for use with Mac. Required DMX Converter is sold separately. Each purchase includes a Security Key required for DMX control. Each universe is 512 channels; multiple universes available.

Scan the QR code for more info on this product.

Or log onto www.vincentlighting.com/product/feature/GAM_Plexus.php

LEX PRODUCTS EVERGRIP®

Lex Products' EverGrip multi-cable gets high ratings in our book. For one, the thermoplastic resin premold creates a strong bond between the cable and connector for superior strain relief and secure terminations. The pins and sockets cannot push back, extending life of the connector, and rugged construction helps prevent broken conductors and loose or damaged ground rings. The keyed design prevents misalignment or mismatched connections.

EverGrip multi-cable is worth every penny of your investment to extend the life of your cable.

ORDERING INFORMATION

PRICING

Lamps are not included with fixtures unless noted. Quantity discounts are available on items in this catalog as well as pricing on non-listed items. Pricing is subject to change without notice due to misprints, manufacturer cost increases or circumstances beyond our control. Prices do not include shipping or sales tax. Please call any of our offices for current prices and quantity discounts.

PAYMENT

All Purchase Orders are subject to acceptance at our home office in Cleveland, Ohio. Tax exempt customers must provide an original tax exemption form to the Cleveland, Ohio office.

Terms are Net 30 days, from date on invoice for approved accounts. Two percent (2%) per month service charge will apply thereafter (equivalent to 24% per year). We accept cash, check, Mastercard, Visa and American Express for orders without an approved account.

SHIPPING/TRANSPORTATION/SHIPPING CLAIMS

If ordered before noon, all in-stock items usually ship the same day. With your order, please provide shipping instructions and the date for which items are needed. In the absence of shipping instructions, our Shipping Department will use its best judgment. Partial shipments on any order will be made at the request of the customer or at our discretion. F. O. B. shipping point. Freight will be prepaid and the charge added to the invoice or invoiced separately in some cases.

Vincent Lighting Systems will not be liable for late delivery and/or inability to perform caused by any contingency beyond its control, including without limitation: strikes, riots, acts of terrorism, lockouts, war, accident, weather, fire, flood, disaster, inability to obtain materials essential to the manufacture of products, or governmental or other limitations or restrictions on material, labor, manufacturing, delivery, or shipping.

All claims for loss or damage in transit must be made by consignee to carrier, although we will render every aid and assistance in the presentation and enforcement of such claims without waiver of our rights to have compliance with the terms for payment of our invoices.

MANUFACTURER WARRANTY

Products are carefully tested and inspected at the manufacturer and are warranted to be free of material and workmanship defects when shipped.

Any equipment which is proven defective in material or workmanship will be repaired or replaced at our discretion upon written authorization, according to the terms of the manufacturer. Customer may be responsible for all shipping charges on warranty repairs.

We will not assume any responsibility for labor expended or materials used to replace and/or repair equipment without our prior written authorization.

RETURNS

We hope you are pleased with the merchandise you purchased from us. If it fails to meet your expectations, please call us immediately. **Merchandise can only be returned with prior authorization.** Please call for Return Goods Authorization number (RGA). Any merchandise returned without authorization will be refused. To request an RGA, please provide the following information: reason for return, quantity, catalog part number(s), purchase order number and invoice number. Once you obtain an RGA, shipment can be made and the merchandise will be credited upon receipt. The RGA will be voided if merchandise is not received 30 days after date of issuance. Customer is responsible for shipping charges to return merchandise. Special, custom-made equipment or custom-cut material cannot be returned, except for defects in materials, manufacture or workmanship.

All returns are subject to a 25% minimum restocking charge, plus any cost of reconditioning which, in our judgment, is deemed necessary. Freight and labor charges will not be credited.

RENTALS

Minimum rental period is one day. Please reserve rental equipment in advance to allow for preparation. Rental equipment must be returned by 10:00 AM the morning it is due back. We reserve the right to bill for cancellations made without reasonable advance notice. Spare lamps are provided with rental fixtures at no additional charge, although dead lamps must be returned with the rental to avoid replacement costs. Customer is responsible for all lamps on rental periods over one week.

ABOUT VINCENT LIGHTING SYSTEMS

WHO WE ARE

Founded in 1978, Vincent Lighting Systems (VLS) has offices in Cleveland, Cincinnati, Pittsburgh and Detroit. VLS provides theatrical, television, film, video and architectural lighting for a wide range of businesses including corporations, performing arts centers, educational and religious organizations.

For a complete list of our team members, log onto www.vincentlighting.com.

PRODUCTS AND SERVICES

From design through installation and training, our years of experience can be applied effectively to your project whether it's a performing arts center, theatre, television studio, place of worship or other venue. Our team offers a full range of production services for special events, from design conception to delivery, set-up and operation. Vincent Lighting Systems is an authorized service center for virtually all of the products and lighting systems we sell and rent. With a large parts inventory and appropriate diagnostic equipment, we can perform fast, efficient service on a wide range of lighting control systems and equipment. For systems, supplies, rentals and service, turn to Vincent Lighting Systems.
